

Upcoming Workshops

We received a large number of expressions of interest in the workshop, and the course is now fully booked. However, if you would like to register your interest in future events then please complete the form at

<https://creem2.st-andrews.ac.uk/analysis-of-data-from-high-resolution-animal-borne-tags-workshop/> to be included in our mailing list and we will send you details of future opportunities to participate in an "Analysis of data from high-resolution animal-borne tags" workshop.

"Tag data processing and visualization"

Location: 22nd Biennial Conference on the Biology of Marine Mammals, Halifax, NS

Dates: Saturday 28th October 2017

Status: Places available

We will be running the "Tag data processing and visualization" module of the "Analysis of data from high-resolution animal-borne tags" workshop as a one day event at the Society for Marine Mammalogy Conference in Halifax, Nova Scotia in October this year. We have been allocated a venue for an all day workshop on Saturday 28th October (which is immediately after the conference).

All registrations must be made through the SMM conference website and are offered on a first come, first served basis (there are 30 spaces available). For further information and to register please visit

<http://www.smmconference.org/WorkshopDescriptions>

Register Interest in future workshops

We are looking to organize a further course, most likely in the USA, in 2018. Details of this event will be posted here. We will also send out details of future events to everyone on our mailing list. To join the mailing list and register your interest in future events then please complete the form at
